Founder Speaks-

"As we can already see, the quality of Air is degrading day by day, so, the indoor air quality would be a big challenge for society and country as a whole. Because of the prevailing issue, since last 2 years, offices were closed and our UVGI System has helped them to build their confidence & re-open their offices. We foresee this market will grow to Rs 5000 Cr by 2030."

- **Ankit Sharma, Co-founder, Airific System, Noida**
