## **Founder Speaks-**

*"The insurance industry is undergoing a major transformation, especially after the COVID-19 pandemic when concerns regarding a secure health and life insurance were high. These changes are driven by InsurTech firms that are upping their game by driving new inventions using new age technologies like AI, ML, Blockchain, Internet of Things (IoT) and Cloud Computing. These technologies are replacing legacy software and providing self-driving processes for building and managing an insurance business. In addition, because of changes in business models, insurance companies are also using digital solutions to grow their business and develop product lines based on customer demand that contributes to market growth."*

**- Layak Singh, Chief Executive Officer, Artivatic.AI, Bengaluru**
