- Offers solutions like self-diagnosis through tools and provides the necessary treatments to patients diagnosed with mental illness
- Aims to normalize discussion around the subject and to integrate mental health practices into primary healthcare
- Launched website and Android app; the app is AI & ML chatbot based that provides detailed productized services to each individual.
- Working on IOS app and would be launching it soon
- In the process of getting some patents
- To extend services to as many schools, colleges, and other institutions as possible

- To expand to international markets and cover the gap in mental healthcare, in India as well as outside

Founder Speaks-

"Mental health and emotional wellness have been very underrated in our country. People deal with many other issues when they go through mental health problems, we have seen throughout the world that higher stress levels lead to many other chronic illnesses. The global mental health market was valued at \$383.31 billion in 2020 and is estimated to reach \$537.97 billion by 2030, growing at a CAGR of 3.5% from 2021 to 2030."

- Krishna Veer Singh, Co-founder, Lissun, Gurugram
