

Crosscope partners with BALCO Medical Centre for AI-based cancer care

31 January 2022 | News

To highlight how digital transformation in pathology can bring change in the lives of cancer patients

Crosscope, a Silicon Valley-based leader of AI-enabled Digital Pathology Software, and BALCO Medical Centre, a flagship unit of Vedanta Medical Research Foundation (VMRF) in Raipur, are joining hands for the digital transformation of their pathology department.

The collaboration will focus on using an AI-enabled Digital Pathology Platform from Crosscope, thereby, transforming analogue histopathology workflow to AI-enabled digital workflow for the hospital.

The partnership will lead to the deployment of Crosscope's Digital Pathology platform to provide AI-based diagnostics support ensuring precision-based, time-bound cancer diagnosis, support collaboration, pathology workflows, and archiving of pathology images.
