# ICPA's session provides insights for beginners in dental care

08 February 2022 | News

**The next episode of ICPA Clinical Series is scheduled for February 24, 2022**

ICPA Health Products Ltd (ICPA), hosted an interactive online session for the benefit of beginners in the field of dental practice. In the eighth episode in the ICPA Clinical Series, Dr Amol Thorat, MDS (Prosthodontics) was the guest speaker and focussed on addressing the top three challenges dentists face in full mouth implant rehabilitation.

The session highlighted some essential and critical components of implant rehabilitation, including prosthetic treatment planning, diagnostic wax-up, and trial dentures. Dr Thorat also stressed the importance of following the canine-molar rule and the concept of a five-sided arch in deciding the number and position of implants, among other recommendations.

The next episode of ICPA Clinical Series is scheduled for February 24, 2022, with Dr Sandeep Singh speaking on making use of ‘dentin autografts in implantology’.

‘ICPA Clinical Series’ is an initiative to address specific clinical challenges dentists face in their everyday practice. Themed’ Each Episode-One Clinical Challenge,’ the series is moderated by ICPA’s Technical Head of Marketing, Dr Rajeev Chitguppi.
