Carestream India launches advanced digital radiology solution The DRX Compass

23 February 2022 | News

The DRX Compass comes in two configurations, Floor Mounted Tube System and Ceiling Suspended Tube System

Mumbai-based Carestream Health India has launched The DRX Compass, an accurate, convenient and configurable digital radiology solution designed to provide radiologists with a whole new level of efficiency.

Additionally, DRX Compass offers the versatility to build the desired configuration from a wide range of selections in detectors, tubes, generators, tables, collimators, giving radiology facilities full control over how they can use this future-proof digital radiology technology.

The DRX Compass comes in two configurations, Floor Mounted Tube System and Ceiling Suspended Tube System. With colour-coded buttons, optional wall stand angulates, optional auto-centering and a common interface among all Carestream CR/DRX products, technicians can derive the most value from DRX Compass without sacrificing a lot of time and energy in learning how to use the equipment.

There is also an optional Auto-LLI facility that facilitates easy acquisition of long-length imaging.
