Siemens Healthineers launches latest innovations in medical imaging

25 March 2022 | News

Introduces unique solutions in MRI and CT portfolio- MAGNETOM Free.Star and NAEOTOM Alpha

Siemens Healthineers showcased the latest products and technologies in radiology at 74th National Conference, IRIA 2022, Bengaluru. The company introduced its unique solutions in MRI and CT portfolio- MAGNETOM Free.Star and NAEOTOM Alpha.

MAGNETOM Free.Star belongs to the new generation of scanners from Siemens Healthineers based on our revolutionary High-V MRI Platform. It is built on the latest DryCool technology, it is a virtually helium-free scanner with an ultra-compact footprint that is far easier to install.

Based on the revolutionary direct signal conversion of its QuantaMax detector, NAEOTOM Alpha offers high-resolution images at minimal dose, spectral information in every scan, and improved contrast at lower noise. Photon-counting CT will advance medical diagnostics towards precise, non-invasive diagnosis in cardiology, pulmonology, oncology, and emergency medicine.

Dr Umesh Krishnamurthy, Professor, and Head, Department of Radiology, M S Ramaiah Hospital, Bengaluru, and Organising Chairman of IRIA 2022 unveiled the product during IRIA 2022.
