Premas Life Sciences partners with Beckman Coulter

01 April 2022 | News

Premas is planning to reach out to every genomics lab in the country to provide automated NGS solutions

Premas Life Sciences and Beckman Coulter have announced a new sales distribution agreement, appointing Premas Life Sciences as the technology and knowledge partner of Beckman Coulter Life Sciences Automated Liquid handling solutions in India.

Through this partnership, Premas is planning to reach out to every genomics lab in the country to provide automated next-generation sequencing (NGS) solutions.

As experts in fluid transferology, Beckman Coulter Life Sciences offers a broader range of flexible, scalable liquid handling solutions for genomic, cellular, protein and other workflows - for research areas such as drug discovery, biopharma, agriculture, synthetic biology, forensics and more.

Chaitanya Gundu (G A Krishna Chaitanya), Country Sales leader, India, and SouthWest Asia, Beckman Coulter Life Sciences said, "We are extremely delighted to partner with Premas Life Sciences for our Liquid handling and genomics portfolio. They are at the forefront of bringing the most cutting edge and niche life sciences tools for the advancement of Indian Research & Clinical Diagnostics."

Yogeendra Dawalkar, General Manager - Commercial, Premas Life Sciences commented, “We at Premas Life Science pride ourselves in bringing cutting edge technologies in Genomics to India and are excited to add Beckman Coulter Life Sciences Automation & Genomics products to our portfolio. This will enable our customers to scale up laboratory throughput as per their need."
