

Apollo Cancer Centre opens in Bhubaneswar with advanced technologies

02 April 2022 | News

The centre is equipped with True Beam STx technology

Chief Minister of Odisha, Naveen Patnaik inaugurated the Apollo Cancer Centre (ACC) in Bhubaneswar. Apollo Hospitals, Bhubaneswar, has built the state-of-the-art Cancer Centre on the same premises with a built-up area of 50,000 sq ft. It is the first and only cancer centre in Odisha to be equipped with True Beam STx technology.

The centre is equipped with Odisha's first and only cutting-edge Linear Accelerator (HD-True Beam STx) technology and, internationally acclaimed oncologists in all specialities. The True Beam STx which is the most advanced Linear Accelerator radiation machine offers the most precise radiation therapy treatment for a better outcome. The centre has Positron Emission Tomography-Computed Tomography (PET CT). The 64 slice PET CT machine is equipped with all modern facilities to do every type of PET CT including PET guided biopsies.

The newly built centre has 17 dedicated beds for chemotherapy. It is also a major referral centre for the people of Odisha and the neighbouring states of Bihar, Jharkhand, Chhattisgarh, and parts of West Bengal. Apollo Cancer Centre has organ-specific cancer management teams delivering exceptional clinical outcomes.
