Bayer sets up 500 LPM capacity oxygen plant in Odisha's Sambalpur district

08 April 2022 | News

The plant has the capacity of 500 LPM which will help supply 93-95 per cent Pure Medical Oxygen to 100 beds

Bayer has launched an oxygen plant with 500 LPM capacity, at SDH Rairakhol in Sambalpur district of Odisha, as part of its CSR initiative focusing on strengthening healthcare facilities in rural and underserved parts of India.

The plant has been set up with a capacity to supply up to 100 beds in the hospital and aims to fulfil the critical need for medical-grade oxygen in a hospital. The pressure swing absorption (PSA) Oxygen plant will generate, supply and store 93-95 per cent Pure Medical Oxygen for about 100 oxygenated beds.

Apart from the Sambalpur district of Odisha, Bayer is also setting up oxygen plants in the Raichur district of Karnataka, Tikamgarh in Madhya Pradesh, and Guwahati in Assam.
