

Docty to set up 100 digital health kiosks across Telangana, AP, Maharashtra

12 April 2022 | News

Launches Gali Gali Mein Digital Clinic programme

Docty is aiming to set up 100 Digital Health Kiosks across Telangana, Andhra Pradesh and Maharashtra. As a part of this 'Phygital Care' programme *Gali Gali Mein Digital Clinic*, Docty has partnered with 100+ offline stores, local pharmacies, photocopy centres, and Internet cafes in these geographies. The initiative is dedicated to improving digital healthcare accessibility for the rural and impoverished urban communities of India.

The kiosks will also enable residents to consult doctors across 28+ specialities. Docty kiosks will be set up at every three kilometres in cities, and 5 kilometres in villages, providing access to quality healthcare in almost 'every Gali'.

Over 2022-23, Docty plans to further expand its Digital Health Kiosks across Tamil Nadu, Uttar Pradesh, and Bihar, covering all their surrounding villages and tier-III cities.
