Thermo Fisher deploys cryo-electron microscopy solution at CCMB

13 April 2022 | News

The facility will be accessible to researchers in CCMB, and other CSIR labs

Thermo Fisher Scientific has deployed the state-of-the-art cryo-transmission electron microscope at the Centre for Cellular and Molecular Biology (CCMB), Hyderabad. The facility was inaugurated by Dr Shekhar Mande, Director-General, Council of Scientific and Industrial Research (CSIR).

Thermo Fisher's cutting-edge cryo electron microscopes support advanced research and help scientists accelerate potential cures, drug discoveries and diagnostics research. The facility will be accessible to researchers in CCMB, and other CSIR labs as well as researchers from other institutes, universities, pharma and biotech companies in the country.

Thermo Fisher solutions deployed at the new facility also feature a suite of automation and sample-handling technology, increasing ease of use and ensuring the maximum amount of high-quality data that can be collected for each sample.
