

Transasia donates Erba H 360 to PATUT for thalassemia children

11 May 2022 | News

The initiative will help to create awareness, screening, early detection and prevention of thalassemia

As a part of its corporate social responsibility for the benefit of thalassemia children, Transasia Bio-Medicals has donated Erba H360 to Parent Association Thalassaemic Unit Trust (PATUT). Erba H360 is a fully automated 3 Part Differential hematology analyser that aids in the screening of hemoglobinopathies.

More than 15000 units of the three instruments – Erba H 360 (3 Part Differential Hematology Analyser), Erba H 560 (5 Part Differential Hematology Analyzer) and Erba Elite 580 (5 Part Differential Hematology Analyser with autoloader) have been installed across the country.

Transasia felicitated Malik Ashab, General Manager and Dr Sonal Gupta of Redcliff Labs for installing the landmark 15,000th hematology analyser. Dr Pankaj Shah, MD, Aspira Pathlab & Diagnostics was felicitated for installing the 15001st instrument.

The occasion was attended by more than 700 doctors, customers, well-wishers and supporters of Transasia and PATUT.

A musical concert was organised where singer Pankaj Udhas took part.
