HealthEM.AI wins NASSCOM's Healthcare Innovation Challenge 3

14 June 2022 | News

HealthEM.AI is Tredence's value-based care management platform that improves healthcare outcomes at speed and scale by turning data into actionable insights

Tredence, a leading data science solutions provider, announced that its care-management platform HealthEM.AI won NASSCOM's Healthcare Innovation Challenge 3 in the 'inpatient volume prediction based on outpatient Volume' category. Organised by NASSCOM Centre of Excellence (CoE) – IoT & AI, the initiative aims to support tech innovation in health care by making it efficient, effective, and easily accessible.

HealthEM.AI is Tredence's value-based care management platform that improves healthcare outcomes at speed and scale by turning data into actionable insights.

Built by medical science and data science professionals, HealthEM.AI aims to drive value-based care through advanced AI and machine learning models while optimising costs for healthcare providers and payers.
