Lupin Diagnostics opens regional reference lab in Patna

15 June 2022 | News

The company looks forward to making a deeper foray into Bihar

Lupin has launched its first Regional Reference Laboratory in Patna, Bihar. The new Regional Reference Laboratory at Patna has capabilities to conduct a broad spectrum of routine and specialised tests in the fields of molecular diagnostics, cytology, microbiology, serology, haematology, immunology and routine biochemistry.

By establishing a presence in Patna, the company now looks forward to making a deeper foray into Bihar. Earlier this year, Lupin Diagnostics opened its Regional Reference Laboratories in Assam and West Bengal.

Through upcoming launches of laboratories in Jharkhand (Ranchi) and Orissa (Bhubaneshwar), the company is poised to solidify its position in east India.

The company started its journey by establishing a state-of-the-art 45,000 square foot National Reference Laboratory in Navi Mumbai with world-class equipment, experienced doctors assisted by trained technologists, and stringent quality control protocols.
