

## Karnataka hospital conducts 50 robotic surgeries since June 2022

28 July 2022 | News

### Precision-based surgical services lead to reduced morbidity

Karnataka-based AASRA Group of Hospitals has completed over 50 robotic surgeries since its launch in June 2022 using robotic surgery. MAKO smart robotics and CMR surgical robotic system have been used to perform various surgeries conducted across various specialisations including gynaecological, urological, gastrointestinal, thoracic and many more.

Precision-based surgical services lead to reduced morbidity and improved recovery time in all the surgeries done.
