Mylab unveils advanced innovation centre for diagnostics

28 July 2022 | News

Mylab Global Innovation Centre is spread across 42,000 square feet

Pune-based startup Mylab Discovery Solutions has announced the opening of India's most advanced Innovation Centre for diagnostics in Pune. 'Mylab Global Innovation Centre' was inaugurated by Dr Cyrus S Poonawalla, CMD, Serum Institute of

India.

The centre will develop and commercialise pioneering diagnostic innovations in diverse fields including molecular, serology, immunology, automation, robotics, AI-based diagnostic solutions, devices and biosensors. This futuristic centre aims to drive cutting-edge research and advance impactful solutions to address healthcare challenges for Indian and international markets.

Spread over 42,000 square feet, the centre will be equipped with state-of-the-art equipment and comprehensive research capabilities that enable research scientists and engineers to bring ideas to life. It will have over a 450-strong employee base – 70 per cent of whom are research scientists, with a dynamic work environment.
