

Roche Pharma India, SKCC, USA launch certification prog for oncologists, pathologists

23 August 2022 | News

The programme will train over 100 cancer specialists, pathologists in personalised medicine

Roche Pharma India in partnership with Sidney Kimmel Cancer Center (SKCC) – Jefferson Health, Pennsylvania, USA and BioQuest Solutions, has launched a one-of-its-kind Advanced Certification Programme in Molecular Oncology (ACMO) to equip oncologists and pathologists in the country with methods of genomic/personalised medicine.

Around 100 healthcare professionals including 70 oncologists and 30 pathologists from across the country will be trained under this programme. Comprising 14 online modules, the programme spreads over eight months and aims to provide comprehensive, evidence-based updates on personalised medicine.

The programme faculty will include professors from various departments affiliated to Thomas Jefferson University, including oncology, urology, computational medicine, biochemistry and molecular biology. Interspersed with live virtual sessions, the online programme is a case-based, self-learning, interactive certification course.
