SciGenom, CHARUSAT University announce industry-oriented PhD programme

29 August 2022 | News

The PhD programme will support research in the disciplines of genomics, proteomics, microbiome and bio-nanotech

SciGenom Labs, a genomics company with facilities in India (Cochin, Chennai, Hyderabad) and the US (San Francisco), has announced a unique industry-based PhD programme to support research in the disciplines of genomics, proteomics,

microbiome and bio-nanotech in collaboration with CHARUSAT University (Charotar University of Science and Technology), Gujarat.

This industry-academia collaboration will provide students with an opportunity to participate in research activities with multiple international universities and scientists from independent research institutions to find solutions to real-world problems that plague humanity while working in SciGenom.

The students should have qualified in one of the National Eligibility Tests for Junior Research Fellowship such as (NET-JRF) CSIR-UGC, DBT, GATE and INSPIRE. The selected students will be registered with CHARUSAT university while working with one of the leading companies under the SciGenom group of companies. The selected researchers will be provided with an additional stipend during their PhD program in addition to the government fellowship. Admissions will start in September 2022 and will continue throughout the year.
