

Carestream Health India unveils DRX Compass

30 August 2022 | News

The Carestream DRX Compass offers diagnostic quality with the least amount of patient dosage and ease of operation for technicians

Carestream Health India recently unveiled the newly launched DRX Compass DR system at Delhi Medical Association Conference. The Carestream DRX Compass offers diagnostic quality with the least amount of patient dosage and ease of operation for technicians, improving the diagnostic capabilities and productivity of the diagnostic facility. With the DRX Compass DR system, customers can configure their system based on their needs and budget, with a focus on improved workflow and easy upgrades for the future.

Commenting about the DRX Compass launch Mr. Niraj Srivastava, General Manager- Sales North Carestream India said, "Carestream has invested significant expertise, time and resources in building this digital radiology solution and am sure customers in North India can 'Navigate & Accelerate' their radiology practice with this 'Personalized, Powerful & Partner technology'."
