

Dr. Reddy's deploys IQVIA Orchestrated Customer Engagement platform

28 September 2022 | News

Enabling life sciences clients to digitally transform their sales and marketing operations

IQVIA has announced that Hyderabad-based pharmaceutical firm Dr. Reddy's Laboratories has selected IQVIA Orchestrated Customer Engagement (OCE) platform as its core customer relationship management (CRM) solution for its entire field force in India.

Mukesh Rathi, Global Chief Digital and Information Officer, Dr. Reddy's Laboratories said, "OCE will help streamline our field processes and in-clinic customer interactions, while driving productivity, and improving our field team's experience with digital tools."

Under the terms of this multi-year agreement, Dr. Reddy's will rollout IQVIA's OCE application to its entire field force and marketing users in India to drive more meaningful and impactful customer engagement by seamlessly linking marketing, sales, medical science liaison, account management, and other functions.

OCE is IQVIA's CRM Application Suite that enables life sciences clients to digitally transform their sales and marketing operations. Powered by IQVIA Connected Intelligence, OCE provides role-specific intelligent workflows that improve decision making and make HCP engagement smarter, faster, and more convenient. The OCE suite is a highly configurable and scalable SAAS based CRM solution which is built on best-in-class platforms, such as Salesforce.com, Mulesoft, Amazon Web Services, Heroku, and Box.

Currently, more than 190 life sciences companies worldwide successfully use OCE as their flagship CRM system. The platform provides a scalable, standardized solution that meets local requirements as well as global ones, besides providing near real time in-clinic and field analytics. IQVIA has set up a dedicated team and delivery center in Bangalore to assist pharma companies, including those in India, in leveraging these solutions.
