PharmNXT Biotech unveils single-use bioprocessing unit in Pune

10 October 2022 | News

To generate employment opportunities for over 100 to 200 people

Mumbai-based PharmNXT Biotech has launched its first integrated manufacturing unit in Pune to provide single-use bioprocessing solutions. The state-of-the-art facility has been launched to address the challenges of biologics manufacturing in the country. The manufacturing unit will be called PharmNXT *ekuse* and is spread over 40,000 sq ft.

The new facility was launched at PharmNXT Biotech, the company's facility in Chakan, Pune. Housing the latest production technology, the plant is built to provide single-use bioprocessing solutions with plans to cater to the demands of global markets such as Singapore, Korea, Europe and the US. The new facility will also generate employment opportunities for over 100 to 200 people.

The *ekuse* manufacturing facility will be engaged in crafting the Xelta range of single-use bioprocessing products and 'NXTmix' a levitating mixing technology.
