SRL Diagnostics opens upgraded state-of-the-art laboratory at Gurugram

02 November 2022 | News

Residents of NCR will now have access to a robust test menu of over 3500+ tests from SRLâ??s large laboratory network across India

SRL Diagnostics has launched its newest upgraded state-of-the-art laboratory at Gurugram. The new reference laboratory sprawled over 25,000 sqft will serve as the nodal laboratory for all its reference labs in North India and East India. The facility was inaugurated in the presence of luminary doctors; Prof. Dr Ashok Seth (Padmashri, Padmanbhushan Awardee), Dr Narottam Puri and Dr Ashutosh Raghuvanshi.

The laboratory is equipped to perform high-volume diagnostic testing services offering increased productivity, superior diagnostic quality, and enhanced capacity to meet current and future regional demands.

The SRL lab at Gurugram is also the Centre of Excellence for human leukocyte antigen (HLA) testing & transplant immunology. Apart from highly specialised compatibility testing and evaluation needed for successful transplants, the centre of excellence will also focus on research, academics, knowledge sharing and skill building.

The lab also houses all clinical laboratory departments including clinical chemistry, haematology, histopathology, biochemistry, flow cytometry, microbiology etc. The laboratory has the capacity to conduct over 10,000 tests per day with a team of experienced and qualified pathologists.
