Fujifilm India expands endoscopy solutions for therapeutic gastrointestinal applications

10 January 2023 | News

New products unveiled at the Indian Society of Gastroenterology conference

Fujifilm India has announced the expansion of its endoscopy solutions portfolio by launching the ClutchCutter and FushKnife. The products were unveiled at the 63rd Annual Conference of Indian Society of Gastroenterology-ISGCON, Jaipur, held from 5th to 8th January 2023.

The three-in-one device, ClutchCutter is a rotatable forceps that supports clinicians in making incisions, dissections and coagulation. Built for the most rigorous procedures, ClutchCutter features jagged, serrated jaws for enhanced clutching ability and an insulated outer edge for maximum durability. Where else the FlushKnife is a diathermic slitter that allows clinicians to carry out multiple applications including marking, flushing, incision, dissection and coagulation. Product features include a ball tip option with excellent traction, enabling dissection of the target tissue and effective coagulation.

The products were launched in the presence of Kohei Aiba, Senior Manager, Bio CDMO Div, FUJIFILM Asia, Dheeraj Chaudhri, Head of Endoscopy Division, Endoscopy Systems Division , FUJIFILM India and Tomosuke Okada, Japanese Advisor, Endoscopy Systems Division, FUJIFILM India.
