

Portronics unveils new 3MP Otoscope 'XLIFE' for ear cleanup

12 January 2023 | News

Portronics XLife uses a skin-friendly and hygienic screw-furled silicone (scoop) tip for maximum safety

Portronics has announced the launch of its latest and upgraded otoscope XLife. Powerful enough to wirelessly stream a 360° Full HD view of external acoustic meatus (ear canal) on your smartphone and a safe silicone scoop tip to help you clean out the usual/daily build-up of earwax.

Portronics XLife uses a skin-friendly and hygienic screw-furled silicone (scoop) tip for maximum safety, and behind it is a powerful eye that ensures everything is at a safe distance. The 3-megapixel eye (FHD camera) features an ultra-fine 3.5mm lens for a crisp and clear view of everything ahead and around it, with a 6-LED spotlight to keep everything bright. To make things safer and more convenient the otoscope includes a 3-axis gyroscope for a 360° view for better handling.

The product comes with Wi-Fi 2.4GHz connectivity for easily monitoring your ear directly via your smartphone, be it Android or iOS, using the XLife App. Completely wireless, Portronics XLife has an internal rechargeable battery (USB-C port for charging) which on a full charge offers a 30-minute playtime. The product weighs 13 gm.
