Third in Genomics India series GIC 2023 to get bigger & better

16 January 2023 | News

34+ speakers will deliver their talk across 12+ sessions covering a plethora of topics

Genomics India 2023 Conference (GIC), a two-day genomics conference, aims to bring together industry, academia and research that will feature informative talks on current trends and advancements in genomics.

The conference, taking place on 2 and 3 February 2023 at NIMHANS Convention Centre in Bengaluru, will feature cutting-edge research into the latest advances in genomic technologies, with a focus on sharing path-breaking findings. It will provide an unlimited opportunity to interact with experts from across the industry, including academic, startups and profit and non-profit organisations of the biotech sector.

Presenters at the event will be some of the world's leading companies in vaccine, pharma, biopharma, molecular diagnostics, food, agriculture and biotechnology sectors impacting many industry verticals such as education, healthcare, and manufacturing. They will be presenting and unveiling some of the world's most advanced solutions.

GIC 2023 will have an exciting lineup of speakers and panelists, including renowned luminaries from the Indian and International diaspora, bringing together the best minds and industries across the world to discuss genomics in India.
