

Marengo Asia and Karkinos Healthcare focus on comprehensive cancer care solutions

19 January 2023 | News

The partnership is directed with advanced technology in diagnostics

Marengo Asia Healthcare and Karkinos Healthcare have join hands to address the cancer challenge in India through the message centred around “Let’s win over Cancer”, enabling a long-term, sustainable, socio-economic impact in the onco-care ecosystem.

This strategic partnership will lay the groundwork for systematic population screening for common cancers through importance of early detection coupled with precision diagnosis capabilities and personalized treatment, which is a key to understanding individual cancer proliferation and plan treatment.

The goal is to bring oncology therapy closer to the communities by integrating all services such as chemotherapy and radiation centers through an integrated cancer care network as part of the partnership alongside Marengo Asia network hospitals. In the recent times, India has emerged as a hub for R&D activities and is one of the leading destinations for high-end diagnostic services. We are geared to train doctors and nurses at community levels to render the service deliveries at optimum levels to make the nation a healthier one.

The complex and rare cancer cases will be discussed in Virtual Tumor Board (VTB), which has national and international oncology experts of eminence assuring right and trusted cancer care to patients.

The organisations will continue to stay engaged in academics, research, and innovation to drive precision oncology treatments solutions with evidence-based approach through population analytics.
