

Axio Biosolutions forays into military segment

06 February 2023 | News

Launches website to provide infantry soldiers an easier way to learn about Axio's bleeding control solutions

Axio Biosolutions, a Boston and Bengaluru-based innovative medical device company, has launched a dedicated military website, axiostatmilitary.com, on Combat Casualty Care for Soldiers. The website is designed for all armed forces personnel's (Army, Navy, Airforce, Coast Guards, Special forces etc.)

Axio Biosolutions is the 4th organisation globally, after USA, UK and Israel to develop trauma haemostatic products like Patch, Z-fold & Gauze for the armed forces.

The goal of this website is to provide visitors mainly infantry soldiers, an easier way to learn about Axio's bleeding control solutions and to allow the visitor to browse information based on their requirements. These haemostatic products are highly recommended for gunshot wounds, blast injuries, arterial & venous bleeding, neck & head trauma injuries, etc.

In this website, they have provided complete details of their flagship brand, Axiostat which is bioactive, clinically validated haemostatic dressing that works on a unique charge-based mechanism to stop bleeding quickly. All products in this category are designed to be used in battlefield conditions and come in rugged metal pouches, camouflaged packing for easy carrying.

Through this web portal, the organisation will highlight the various combat casualty care training programmes conducted under the banner of AACE (Axio Academy of Clinical Excellence). In the past one year, the organisation has conducted 25+ combat casualty care training programmes involving more than 2000+ soldiers, nursing assistants & combat medics from Army, Special forces & Paramilitary forces in India.

With the new website, the company also plans to connect with the global security forces and showcase the life saving devices from India.
