Akums partners with Lyrus Life Sciences to manufacture products for global markets

22 February 2023 | News

To bring more innovative products to the medical fraternity

Akums Drugs and Pharmaceuticals, New Delhi-based contract development and manufacturing organisation has partnered with Lyrus Life Sciences for a number of patented technologies and formulations. Lyrus is a research and technology-driven global specialty pharmaceutical company based in Bengaluru.

The unique treatments and therapies emerging from this world-class collaboration will ensure the launch of patented drugs and more patient-friendly formulations that are beneficial for patients.

The products and technologies are carefully selected to address the unmet need in the areas of pain, obesity, diabetes, psoriasis, seasonal flu, respiratory insufficiency, immunity, and women’s health with a special focus on the geriatric and pediatric population.

Managing Director of Akums, Sanjeev Jain shared that the partnership comes at a vital time in the company's journey when there is a need to launch differentiated formulations with global patents thus providing an edge.

C.P. Bothra, Chairman of Lyrus Life Sciences opined, "This agreement is a win-win for both, as combined expertise, technologies, and innovation will be beneficial to both patients and doctors as well."
