

Lupin Diagnostics expands presence in South India with new lab in Hyderabad

01 March 2023 | News

Targets opening 200+ collection centres in South India by March 2024

Lupin has announced the launch of its new Regional Reference Laboratory in Hyderabad. This expansion of Lupin Diagnostics' network is part of the company's strategy to build and strengthen its presence in South India. This regional reference laboratory adds to Lupin Diagnostics' existing network of 380+ LupiMitra collection centres and 23 laboratories across India.

In addition to routine and specialised tests, Lupin Diagnostics offers molecular diagnostics, cytogenetics, flow cytometry, cytology, microbiology, serology, haematology, immunology, routine biochemistry and many more. The team of qualified clinical experts at Lupin Diagnostics leverage state-of-the-art automation and streamlined processes to deliver highly accurate test results.

Lupin Diagnostics provides a comprehensive range of diagnostic services to doctors, patients, and consumers. The company offers several consumer-centric features, such as live home collection booking and tracking, GPS-enabled temperature-controlled sample movement, free home collection, NABL accreditation of each laboratory, smart reports, and trend report analysis.

The company started its journey by establishing a state-of-the-art 45,000 sq. ft. National Reference Laboratory in Navi Mumbai with world-class equipment, experienced doctors assisted by trained technologists and stringent quality control protocols.
