

SRL Diagnostics rebrands as Agilus Diagnostics

27 May 2023 | News

Through Agilus, the company aims to create renewed values for each of its stakeholders

SRL Diagnostics, instituted in 1995, one of India's leading network of diagnostic centres, has announced that as a result of its work over the past few years towards rebranding, it would be adopting a new identity - 'Agilus Diagnostics'. Agilus is inspired by the Latin term, agilis which stands for 'agility'.

The company has built an extensive laboratory network comprising 410+labs, 3700+ customer touchpoints, and 12000+ direct clients. Agilus Diagnostics is India's largest chain in terms of network with presence in 1000+ cities, 34 states, and union territories. Agilus also operates one of the largest accredited network of laboratories in the country; 43 of their labs are accredited by NABL and 3 are recognised under the NABL M(EL)T programme.

It also has two CAP accredited laboratories in Mumbai, India and Dubai. In FY23, the business served a total of over 16.6 million patients and completed 39.1 million tests. The company also has 3 Centres of Excellence (CoEs) focused on Histopathology, Transplantation Immunology and Molecular Pathology.

Agilus Diagnostics (Formerly SRL Diagnostics) has a long list of firsts to its credit, including being one of the first NABL and CAP Accredited Medical Laboratory in the nation, the first ABDM Integrated Laboratory and the only Indian lab to ever partner with the Indian Olympic Association for the Olympics 2020 and 2024, and many more. Through strategic expansion, the development of capabilities in genomics and next-generation diagnostics, superior client experiences, and digitally enabled services, the company aims to continue its legacy of delivering exceptional diagnostic care.
