

HCG Hospitals in Ahmedabad unveils one-of-a-kind 'Night Dialysis Unit'

13 June 2023 | News

The facility allows patients who are busy during the day to utilise the haemodialysis treatment at night and receive its benefits at ease

HCG Hospitals Ahmedabad has announced the launch of a one-of-a-kind Night Dialysis Unit. This revolutionary facility is unique to the city and offers patients the ease, convenience, and benefits of Night Dialysis.

Night Dialysis is an advanced renal care technique designed to improve the patient's comfort and quality of life by allowing them to undergo dialysis while having a restful night's sleep. The treatment is more convenient and accessible for the patient's body to tolerate while effectively removing waste from the blood.

Abhijeet Singh, COO, HCG Hospitals Mithakhali Ahmedabad expressed his views and said, "Our primary focus is on providing comfortable and effective treatments to our patients. With our state-of-the-art dialysis unit, we witness a significant number of patients undergoing dialysis every day. By offering a conducive and compassionate environment, we strive to make a positive impact on their lives, ensuring they receive the best possible care."

The Night Dialysis Unit represents another significant step at HCG in the ongoing commitment to delivering advanced medical solutions that address the evolving needs of patients.
