

Medtech Life introduces heating pads in variable sizes for comfort and pain relief

21 July 2023 | News

Making heat therapy more convenient and accessible

Mumbai-based Medtech Life has launched the Medtech Orthopaedic Heating pad Handypad HP-01. Designed for busy professionals and individuals with hectic lifestyles and desk jobs, this heating pad provides modern, safe, and convenient heat therapy for effective pain relief.

Back pain affects a significant number of adults especially during monsoons, with around 80% of individuals over 50 years old experiencing some form of back pain. Additionally, period cramps are a major cause of distress in women.

Medtech Life's heating pad offers a safe and soothing solution to relieve pain. Lined with velvet fabric for a premium look and feel, the heating pads utilise heat therapy, a trusted and effective pain management technique.

Unlike other heating pads, Medtech's thermostatic temperature controller maintains the set temperature for longer durations. With dual thermostats for dual safety and three heating levels, users can select their preferred temperature, providing them with flexibility and making it easier to navigate their busy day. These pads are foldable, easy and a must to carry during travel.

Medtech currently manufactures over 40 medical devices, including Nebulizers, Blood Pressure Monitors, Digital Thermometers, Pulse Oximeters and Oxygen Concentrators, among others. The company also exports its products to 70

countries, thereby embodying the motto of "Make in India, Make for the World."

The company's Department of Scientific and Industrial Research (DSIR)-approved Research and Development Division focuses on creating superior quality devices for personal healthcare and wellness.
