iHub Anubhuti, IIITD Foundation & DHA to drive healthcare innovation and joint research

26 August 2023 | News

This collaboration will synergise strengths to address critical public health challenges in India

iHub Anubhuti-IIITD Foundation, established under the aegis of the National Mission on Interdisciplinary Cyber-Physical Systems (NM-ICPS) of the Department of Science and Technology, Government of India, has signed a Memorandum of Undertanding (MoU) with Digital Health Associates (DHA) to drive digital healthcare innovation and academic excellence.

This landmark partnership is set to revolutionise healthcare through joint research endeavours and academic exchanges aimed at synergising strengths, driving innovation, and addressing critical public health challenges in India.

The collaboration seeks to propel the development of life-saving prevention, treatment, and management tools against diseases that hold significant public health priority in India. By fostering and conducting high-quality research, the partnership endeavours to fortify and expedite the advancement of healthcare solutions that can transform lives.

One of the key focuses of the partnership is to design faculty and student training programmes to enhance skills and competencies in the healthcare sector. Comprehensive training programmes ranging from 1 to 12 months will be conducted which will aim at equipping professionals, with the expertise required to navigate emerging healthcare technologies.

Along with this, a holistic Quality Improvement Programme will be conducted to elevate the entire healthcare ecosystem. During this, the student projects and ideas will be transformed into tangible products and services by combining efforts with iHub to bring a real-world impact.

A series of collaborative workshops focusing on Digital Health will be organised nationwide. These workshops aim to share knowledge and insights regarding the challenges and opportunities within the healthcare sector.
