

Linde starts production at new Air Separation Unit in Hyderabad

17 October 2023 | News

Construction of this project was completed within an 18-month timeframe

Praxair India (a Linde company, headquartered in Germany) has announced the commencement of commercial production at its air separation unit (ASU) at Patancheru in Hyderabad, Telangana.

This plant will be producing in total 250 tonnes per day of gases including liquid medical oxygen, nitrogen and argon, catering to the requirements of healthcare, pharma and other industrial sectors of the region.

The construction of this ASU project was completed within an 18-month timeframe, starting April 2022, when Linde received official approval from Government of Telangana.

“The new Hyderabad ASU provides us with a manufacturing base in the key market of Telangana and will reduce dependency on supply from other states,” said RC Kaushik, Head of Sales, Healthcare & AT, Linde – India. “With the start of this plant we will be well placed to match the growth expectations in this region and also cater to our healthcare customers and the expanding pharma sector in the state more effectively and efficiently.”

“We were focused on completing the construction within the stipulated 18-month timeframe, despite challenges along the way which impacted the import of critical equipment,” said Anirudh Gharote, Executive Director, Praxair India.

Linde is a leading global industrial gases and engineering company with 2022 sales of \$33 billion. The company serves a variety of end markets such as chemicals & energy, food & beverage, electronics, healthcare, manufacturing, metals and mining.
