5C Network launches state-of-the-art R&D centre in Coimbatore to ignite diagnostic revolution

12 December 2023 | News

Neocortex to play a pivotal role in driving innovation and excellence in healthcare diagnostics

Bengaluru-based startup 5C Network has announced the inauguration of its new Research and Development (R&D) centre, Neocortex, in Coimbatore. This strategic expansion follows the acquisition of Krayen, a renowned data science company based in the city.

Neocortex is set to become the nerve centre for 5C Network's engineering and artificial intelligence (AI) teams. This new facility represents a significant leap in 5C Network’s commitment to revolutionising diagnostic services through technology. The centre will spearhead research and development initiatives, positioning 5C Network at the forefront of healthcare innovation.

With Tamil Nadu housing the second largest number of CT and MRI machines in India, the establishment of Neocortex in Coimbatore is a strategic decision by 5C Network. This expansion not only solidifies 5C Network’s presence in a key region but also enhances its ability to serve clients across the state and beyond.

5C Network is at the vanguard of digital diagnostics in India, serving over 2000 diagnostic centres and hospitals across 300 cities.
