

Impelsys announces launch of advanced medical device testing lab in Mangalore

20 December 2023 | News

To further augment and strengthen robust presence in healthcare

Impelsys, a leading global technology company, has announced the launch of an advanced medical device testing lab in Mangalore. As a provider of cutting-edge technologies to the healthcare industry, this testing facility adds to its wide array of solutions and services, which include data and analytics, artificial intelligence (AI)-powered platforms and solutions, cloud services, and learning solutions.

Vincent Emerald, Global Head & Director of QA – Impelsys, said, "Our goal with this facility is to accelerate transformation in healthcare, which will help hospitals and wellness centres offer safe and secure care to patients. It will also help medical device original equipment manufactureres (OEMs) bring their products to the market faster."

With technology becoming a key differentiator in providing quality healthcare, the medical device testing facility is designed to make diagnostics and patient care safer.

Impelsys offers comprehensive Quality Engineering services leveraging the latest automation tools covering functional and non-functional testing.
