

MediBuddy onboards Kuldeep Singh as Senior Vice President & Head of Engineering

28 February 2024 | News

Seasoned technology leader with 18+ years of technical expertise to drive innovation and scale engineering

MediBuddy, Bengaluru-based digital healthcare platform, has announced the appointment of Kuldeep Singh as Senior Vice President and Head of Engineering. With over 18 years of experience leading distributed teams across the globe, Singh brings a wealth of technical leadership from his notable roles in high-value startups and global financial institutions.

In his new role, he will spearhead the engineering efforts at MediBuddy, focusing on designing and implementing innovative solutions that align with the company's vision of making high-quality healthcare accessible to a billion people.

In his previous role at Gojek, Singh was leading Engineering for Business platforms (Marketplace, Cartography, Customer, and Communication platform). This formed the core engine of Gojek powered by machine learning systems for real-time, high throughput use cases, in pricing, allocations, routing, and incentives.

Prior to Gojek, Singh served as a Distinguished Engineer at Deutsche Bank and Royal Bank of Scotland and as Director of Engineering at Indian e-commerce unicorn Snapdeal. He holds an engineering degree from IIT Delhi.
