US-based ModMed opens global capability centre in Hyderabad

01 March 2024 | News

Aims to grow from its current strength of 100 employees to 200 by the end of this year

ModMed, a US-based company that develops all-in-one cloud solutions for multiple medical specialties, has announced the launch of its first Global Capability Center (GCC) in Hyderabad, India. Located in a new facility in HITEC City, the GCC reflects ModMed's commitment to fostering innovation and harnessing the abundant tech talent in Hyderabad, one of India's fastest-growing GCC hubs.

The state-of-the-art facility is spread across approx. 20,000 square feet. ModMed aims to grow from its current strength of 100 employees to 200 by the end of this year and is actively recruiting across a range of positions in engineering, product development and support.

With more than 1,700 employees globally, including doctors, ModMed powers a medical specialty-specific cloud platform for allergy, dermatology, gastroenterology, OBGYN, ophthalmology, orthopaedics, otolaryngology, pain management, plastic surgery, podiatry and urology practices, as well as ambulatory surgery centers.

With ModMed’s specialty-specific electronic health records (EHRs), practice management, revenue cycle management and analytics tools, as well as products for patient engagement, payment processing and marketing, the company is trusted by over 35,000 providers to help drive clinical and operational success.
