# VFL Sciences launches chemiluminescent substrate GreatPrep EasyECL

18 March 2024 | News

**Reagent for western blotting applications**

Chennai-based VFL Sciences has announced the launch of GreatPrep EasyECL chemiluminescent substrate. This is the first reagent / kit for the Western Blotting applications from VFL Sciences.

The company will be offering a range of products for Western Blotting under the brand name of “Great Prep”. GreatPrep EasyECL is a one component kit for error free results.

There are four different variants- Basic, Ultra, Premium and Supreme, based on signal duration and signal intensity. These kits are custom manufactured in Italy for VFL Sciences. The kits offer detection level from mid picogram to low femtograms.

Vancheeswaran Sankaranarayanan, Managing Director of VFL Sciences states, “VFL Sciences if focusing on becoming the experts in Western Blot applications. With the existing cooperation with UVITEC, we offer chemiluminescence imaging systems and now with the GreatPrep range, we will offer the reagents and consumables needed for western blotting.
