Lupin Digital Healthâ??s Lyfe Platform receives Class C medical device license from CDSCO

25 April 2024 | News

First chronic condition management platform to be recognised as a Class C 'Software as a Medical Device'

Lupin Digital Health, India’s first evidence-based cardiology Digital Therapeutics (DTx) platform, has announced that its Lyfe platform has received approval as a Class C Medical Device from the Central Drugs Standard Control Organization (CDSCO). This milestone marks a groundbreaking advancement in post-discharge integrated care, highlighting the potential of evidence-based digital therapeutics solutions to transform patient care.

Having undergone a rigorous application, review, and on-site audit process, this Class C Medical Device license reaffirms the platform's effectiveness and emphasizes its commitment to quality, safety, and rigour.

Lyfe is now India's first clinically proven remote cardiac rehabilitation programme, designed to enhance heart health and quality of life. By providing tailored, accessible solutions in the comfort of patients' homes, Lyfe empowers individuals to confidently manage their heart health.

Elaborating on the significance of receiving this license, Sidharth Srinivasan, CEO, Lupin Digital Health said, "Securing the Class C Medical Device license for Lyfe is a significant achievement. It validates Lyfe as a best-in-class platform to support millions of cardiac patients in India. This recognition will also encourage more cardiologists, hospitals and insurers to adopt remote cardiac rehabilitation for improved patient health outcomes.”
