SRM University inks MoU with IGCAR for cutting-edge biomedical research

29 May 2024 | News

To provide internship opportunities, research collaboration for projects and industry visits for the students

SRM University-AP has signed a Memorandum of Understanding (MoU) with the Indira Gandhi Centre for Atomic Research (IGCAR) at Kalpakkam, Tamil Nadu, to collaborate on academic and research projects in Biomedical Research, Disaster Management, and other domains.

The MoU was signed by Dr B Venkatraman, Director-IGCAR and Prof. Manoj K Arora, Vice Chancellor, SRM University-AP.

The MoU underscores a mutually beneficial agreement between the two institutes. On the academic front, the MoU provides internship opportunities, research collaboration for projects and industry visits for the students and faculty of SRM AP. This ensures a knowledge transfer between the two organisations, promoting stellar growth in scientific and technological advancements.

SRM AP has already collaborated with IGCAR on a consultancy project in the pioneering field of Biomedical Research last year. The parties have successfully conducted health screening of over 1500 subjects in the Chengalpattu region in Tamil Nadu, with SRM Medical Hospital & Research Centre and AIIMS Mangalagiri as secondary collaborators. Upon the successful completion of the project, IGCAR and SRM University-AP further extend their association with an official MoU for academic and research collaborations.

Both institutes plan to extend their collaborative health screening project to the state of Andhra Pradesh, focusing on the neighbouring villages of SRM AP.
