

Cole-Parmer teams up with UK's Watson-Marlow to offer innovative peristaltic pumps

13 June 2024 | News

To supply a world-class complete fluid handling solution

US-based firm Cole-Parmer, an Antylia Scientific company, has reintroduced peristaltic pumps to enhance its industry-leading line of fluid handling solutions.

For the first time ever Cole-Parmer has teamed up with UK-based manufacturer Watson-Marlow to offer innovative peristaltic pumps optimised for an array of laboratory, pharmaceutical and industrial settings. With a combined 137 years of leadership in fluid path technology, these two trusted brands provide industry leading products and service backed by a Cole-Parmer 100% fit, flow, and performance guarantee.

The 100 Series (120S and 120U) peristaltic pumps offer convenient preconfigured drive and pump head options for off-the-shelf use in fermentation, cell culture and numerous other applications. The 300 Series (323S and 323Du) peristaltic pumps feature interchangeable modular components for added flexibility.

With the reintroduction of peristaltic pumps, Cole-Parmer once again supplies a world-class complete fluid handling solution including its recently relaunched full range of Cole-Parmer branded tubing, fittings, parts and accessories. Tubing options include specialized formulations for use in pharmaceutical, clinical, automotive, water treatment, and food and beverage applications. Fittings are made from high-grade PVC/PBA-free materials in an ISO Class 7 cleanroom to ensure integrity and compliance with national and international standards, including USP, NSF and GMP.
