VFL Sciences launches GreatSpin range of centrifuges

24 June 2024 | News

The company to launch several other models in the next one year

VFL Sciences, based in Chennai, has announced the launch of GreatSpin range of centrifuges. This is the first range of centrifuge from VFL Sciences and the company is planning to launch several other models in the next one year.

GreatSPin is a 'better alternative' to the existing centrifuges in the market with best in class features and benefits.

The new series features advanced centrifuges designed for a wide range of applications in research and clinical laboratories. These centrifuges offer precise control, high speed, and exceptional reliability, making them ideal for sample separation, cell culture, and more.

With user-friendly interfaces and robust construction, Great Spin centrifuges provide consistent performance and longevity.

Vancheeswaran Sankaranarayanan, Managing Director of VFL Sciences states, “VFL Sciences if focussing on becoming the better alternative to the existing instruments in the market with best in class features and value for money. We will be launching more products shortly."
