

MediSim VR unveils India's first VR skill training lab for nursing at KD Hospital, Ahmedabad

02 July 2024 | News

The new lab is set to benefit students' and healthcare professionals' skill development

MediSim VR has announced the establishment of Gujarat's first VR (virtual reality) Skill Training Lab at KD Hospital, inaugurated by the Rushikesh Patel, Health & Family Welfare Minister, Gujarat.

This state-of-the-art VR skill training lab at KD Hospital is designed to provide immersive and highly realistic medical scenario simulations, enabling nursing students and healthcare professionals to practice essential medical procedures and develop critical clinical skills in a safe, controlled environment.

Additionally, the lab is equipped with MediSim VR's ergonomically designed and patented automated VR stations. This innovative technology ensures a high standard of training and helps bridge the gap between theoretical knowledge and practical application.

As a Center of Excellence (CoE), the lab will not only benefit students and healthcare professionals from KD Hospital, but will also extend its advanced training facilities to other nursing colleges across Gujarat, fostering a comprehensive improvement in healthcare education throughout the state.
