Healthcare veteran Sheetal Chand launches AI-based startup healthcare platform to improve diagnostic accuracy

02 July 2024 | News

Backed by an undisclosed amount of Seed Funding Round from XVC.Tech

Healthcare industry veteran Sheetal Chand, with over 22 years of experience in Research, Technology, and Molecular Laboratory Management, has announced the launch of Shealth.AI, a groundbreaking healthcare artificial intelligence (AI) startup.

Shealth.AI is set to transform the healthcare industry by improving the quality of care while significantly reducing costs and time, making primary healthcare more accessible and sustainable for everyone.

The shealth startup, focusing on leveraging AI for healthcare solutions, aligns its Go-To-Market (GTM) strategy with the primary objective of enhancing healthcare delivery through advanced technology. The strategy includes deploying AI-driven tools such as virtual health assistants, medication management systems, and digital consultation services. These solutions are tailored to improve efficiency, accuracy, and patient outcomes in medical settings. The primary targets for shealth are healthcare institutions including Hospitals, Clinics, Healthcare administrations, etc.

The GTM strategy involves direct engagement with these targets through partnerships, direct sales, and participation in healthcare conferences and seminars. Additionally, shealth focuses on educational initiatives to inform healthcare providers about the benefits of AI integration in medical practices.

Shealth.AI is backed by an undisclosed amount of seed funding round from XVC.Tech, enabling the development and deployment of its cutting-edge technologies.
