Yashoda Super Speciality Hospital, Kaushambi unveils â??SmartCare Monitoringâ?? programme with Dozee

06 July 2024 | News

For patient safety and setting new benchmarks for patient care delivery

Yashoda Super Speciality Hospital, Kaushabi, a renowned super speciality hospital known for its state-of-the-art infrastructure, has announced the launch of the 'SmartCare Monitoring Programme.'

This initiative marks a significant step towards preventive and proactive care by integrating Dozee's AI-based Contactless Remote Patient Monitoring (RPM) and Early Warning System (EWS) into all ward beds; the hospital moves beyond reactive measures, focusing on continuous monitoring to identify and address clinical deterioration early.

This strategic move underscores the hospital's commitment to leveraging data-driven technology to enhance patient safety and outcomes, transitioning towards a healthcare ecosystem that prioritises preventive and proactive care over reactive responses alone.

By seamlessly integrating Dozee’s AI solutions through the SmartCare Monitoring Programme, Yashoda Hospital, Kaushambi will mark an important milestone in its digital transformation journey. Dozee enables healthcare workers to remotely monitor patients’ vital parameters such as heart rate, respiration rate, blood pressure, SPO2 levels, temperature, and ECG.

Dozee’s Early Warning System (EWS) tracks vital parameter trends and alerts healthcare providers to detect possible clinical deterioration early, enabling timely medical intervention. Utilising an AI-based Ballistocardiograph (BCG) for contactless vitals monitoring, Dozee's technology is patented and Made in India. This innovative technology significantly impacts patient safety, clinical outcomes, and operational efficiency.
