MediSim VR launches Chennai's first virtual reality-based CoE for medical training

14 July 2024 | News

Redefining medical education by incorporating VR-based learning

MediSim VR has announced the establishment of Chennai's first Center of Excellence (CoE) virtual reality (VR) lab at Sri Ramachandra Institute of Higher Education and Research (SRIHER). This state-of-the-art facility offers access to immersive and interactive VR- training for medical students across the nation.

Since its inception, MediSim VR has benefited over 4,000 students, providing unparalleled access to immersive, hands-on medical training. The innovative VR technology employed in the lab offers realistic medical scenario simulations in a safe and controlled environment to prepare upcoming medical professionals with procedural competency, skills, and the confidence needed to care for their patients.

MediSim VR uses Virtual Reality to bridge the gap between theoretical understanding and practical application to ensure that students are well-prepared for real-world medical situations. This Center of Excellence at SRIHER redefines medical education by incorporating VR-based learning, empowering students from across the state and all over the country to perfect their skills and improve patient outcomes.
