VFL Sciences announces foray into Fermentors and Bioreactors

05 September 2024 | News

GreatFlo Expert and Proficient versions feature unparalleled versatility

Chennai-based VFL Sciences has announced the launch of GreatFlo range of Benchtop fermentors / Bioreactors. The GreatFlo Expert and Proficient versions feature unparalleled versatility and are available in capacities up to 10 litres, and offered both in autoclavable and in-situ sterilisable versions. These are “Better Alternative” to the available models and are built with the best technologies currently available in the market.

The GreatFlo Expert model features fully stainless-steel body with a 10.2 inch colour touch screen. The system offers ease of us , with in-situ sterilisable glass vessels. The system is offered with extensive accessories and controls including DO cascades and SCADA software.

Vancheeswaran Sankaranarayanan, Managing Director of VFL Sciences states, “With the Biomanufacturing expected to grow due to the BioE3 initiative from the government, the GreatFlo products will help the institutions and companies focusing on this area. Our products are built to global standards from India and the technology will be more affordable. We are also planning to launch several new products in this area including truly parallel Bioreactors.”
