Molbio Diagnostics reinforces Goaâ??s healthcare system with new CSR initiatives

11 October 2024 | News

Enters into a partnership with the Directorate of Health Services (DHS), Goa

Molbio Diagnostics, an innovator in global healthcare from Goa, has entered into a partnership with the Directorate of Health Services (DHS), Goa, and the Goa CSR Authority.

As part of this collaboration, Molbio has donated four state-of-the-art Advanced Life Support (ALS) ambulances and two hearse vans, specifically geared for National Highway emergencies.

Additionally, the company has contributed various advanced medical technologies as part of its corporate social responsibility (CSR) initiatives to enhance Goa’s medical response capabilities.

The company is enhancing healthcare accessibility with its revolutionary Truenat real-time PCR platform, recognised by the World Health Organization (WHO). As a leader in decentralised point-of-care diagnostic solutions, Molbio is dedicated to democratising advanced healthcare technologies, ensuring that precise, rapid, and cost-effective diagnostics are available even in the most remote and resource-limited areas.

“We congratulate the Directorate of Health Services and the Government of Goa on the inauguration of new healthcare infrastructure, enhancing the state's ability to respond to health emergencies. At Molbio, we remain committed to supporting the decentralisation of healthcare and ensuring access to quality health services in Goa,” said Shiva Sriram, President of Business Development at Molbio Diagnostics.

This partnership marks a fundamental step in improving the state's responsiveness to health emergencies, ensuring life-saving care is available within the crucial golden hour.
